PROJECTS

Car Search Web Application

- Users can search for cars by specifying the model, year of manufacture, and fuel type.
- The app displays comprehensive details about each car, offering insights into the model, manufacturing year, fuel type, and other relevant specifications.
- The web app is designed to be responsive, ensuring an optimal viewing experience across a variety of devices, including desktops, tablets, and mobile phones.
- Developed this web app using NextJs and TailwindCSS

VOLUNTEER EXPERIENCE

Member

Google Developer Student Club (GDSC)

2022 - Present

UNILAG,Lagos

GDSC is a dynamic community-driven initiative designed to empower and connect student developers around the world. Fueled by Google's technologies, GDSC fosters collaboration, innovation, and skill development.

- Collaborated with other members to make the DevFest Student Edition 2023 Event possible.
- Enhance GDSC's visibility by connecting with individuals who are interested in joining.

Promptopia (Social web application)

- Users create prompts for others to explore and respond to.
- Have the freedom to modify or remove your posted prompts.
- Easily find prompts based on specific tags or keywords, making it simple to discover content tailored to your interests.
- Developed this web app using NextJs, TailwindCSS, MongoDB, NextAuth.js
