I'm a creative and detail-oriented Front-End Developer with 3+ years of hands-on experience building responsive and scalable web applications using React, Next.js, and TypeScript. Proven track record in delivering user-centric features for fintech and SaaS platforms. Skilled in crafting clean UI/UX, optimizing performance, and collaborating across cross-functional teams. Passionate about translating design into functional code and contributing to impactful digital experiences that align with FairMoney's vision of transforming financial access in Africa.

Experience

Lead Frontend Engineer | Social Media App (Remote)
Citizenx / 02/2003 - 12/2024

- Designed and developed responsive web applications using React.js, improving user engagement by 30% through optimized UI/UX.
- Collaborated with Enterprise Architects to define software requirements, ensuring alignment with business objectives.
- Wrote clean, efficient, and maintainable code, reducing technical debt by 25% through refactoring and automation scripts.
- Implemented automated testing with Jest, achieving 90% test coverage and minimizing production bugs.
- Utilized New Relic to monitor system performance, identifying and resolving bottlenecks to enhance application speed by 15%.
- Led a team of 3 developers in an agile environment, delivering projects ahead of deadlines while maintaining high quality.

Frontend Software Engineer | Fintech Startup (Remote)
RoutePay Fintech / 08/2022 - 05/2024

- **Developed and deployed customer-facing features using React Native for mobile (iOS/Android), increasing user retention by 25%.**
- **Built scalable web applications with React, Next.js, and TypeScript, integrating RESTful APIs to streamline financial workflows.**
- **Built scalable web applications with React, Next.js, and TypeScript, integrating RESTful APIs to streamline financial workflows.**
- **Implemented automated testing with Jest and Cypress, achieving 95% test coverage and reducing bugs by 30%.**
- **Mentored 3 junior engineers, enhancing team productivity through pair programming and code reviews.**
- **Contributed to CI/CD pipelines on Azure, cutting deployment times by 40%.**

Frontend engineer
Nailsavvy / 08/2021 - 11/2022

- Built and maintained Angular-based web applications, supporting over 500,000 users with seamless functionality.
- Automated repetitive tasks using scripting tools, saving 10+ hours of manual work per week.
- Conducted code reviews and debugging sessions, improving code quality and team knowledge sharing.
- Worked independently on critical features, delivering solutions that increased customer satisfaction by 20%.
- Documented development processes and ensured software updates aligned with the latest industry standards.

Junior Front-End Developer
Bloocode Ltd / 08/2024 - 09/2024

- Collaborated with back-end engineers to integrate business logic into client applications.

- Worked with designers to ensure accurate design implementation and cohesive visual results.
- Maintained high coding standards, including testing and documentation for reliable and maintainable code.
- Streamlined user authentication and authorization flow, improving user experience and security using React.

Education

HND Computer Science
YABA COLLEGE OF TECHNOLOGY / 08/2017 - 09/2019
Lagos

A HND degree was obtained in these periods.
